Information Security Policy (WEB)

The main theme of our Information Security Management System is to increase our service quality by providing secure, accessible, continuous and accurate information, to ensure internal and external customer satisfaction, to ensure information security management, to ensure risk management, to measure information security management process performance and to regulate relations with third parties on these related issues. This includes;

- Ensuring confidentiality by preventing uncontrolled access to information,
- Continuously ensuring the three basic elements of the Information Security Management System in all activities carried out;
 - Confidentiality: Preventing unauthorised access to important information
 - Integrity: Ensuring the accuracy of the information
 - Accessibility: To be able to access information continuously within authorisations
- Controlling the accessibility and continuity of the system through continuous and regular review,
- Ensuring, regularly monitoring and reviewing the risk management by identifying, evaluating and improving the risks to the existence of information,
- Increasing the awareness of employees on information security and continuity issues through necessary training and studies, Ensuring readiness against all kinds of threats,
- To be ready for all events that may threaten business continuity,
- To provide the necessary infrastructure and awareness raising for the protection of all information, including personal information of our customers,
- It is our duty to manage and ensure the availability of information within the framework of the law, complying with legal, regulatory and contractual requirements.
